DAYENU

Road & Environment Cleaning Service PLC

CAPABILITY STATEMENT

Institutional Profile · Service Deliverables · Operational Framework

EST. 2026 · ADDIS ABABA, ETHIOPIA · 24/7 OPERATIONS

1. Executive Summary & Organizational Identity

Dayenu Road Cleaning Service PLC is a registered Ethiopian managed-service provider delivering structured, fully supervised cleaning, waste-management, environmental sanitation, and public-space maintenance services. Unlike informal labour supply, Dayenu operates on a single accountable service model: every route, corridor, and facility is executed to a documented scope, confirmed schedule, inspected by field supervisors, and reported to clients. Headquartered in Bole Medhaniyalem (Bole Sheger), Addis Ababa, our operations mobilize trained personnel, heavy & light cleaning machinery, verified PPE, and 24/7 urgent response teams across the metropolitan area.

Managed, Not Staffed

Single accountable provider managing recruitment, attendance, tools, PPE, supervision, and logistics under one contract.

Supervised Every Shift

Every operational shift begins with safety briefings and ends with supervisor checklists, inspection records, and photo logs.

Procurement Ready

Fully structured for municipal tenders, corridor programs, RFQs, framework agreements, and verified pilot deployments.

2. Target Clients & Institutional Sectors

- **Municipal & Sub-City Administrations —** City streets, arterial roads, medians, urban corridors, and public sanitation points.
- **Corridor Development Programs —** Comprehensive corridor upkeep, dust control, median greenery, and handover maintenance.
- **Industrial Parks & Logistics Centers —** Compound roads, plant access ways, warehouse zones, and perimeter sanitation under site rules.
- **Commercial Centers & Towers —** Paved plazas, vehicle entrances, building perimeters, and scheduled facility cleanliness.
- **Healthcare & Educational Facilities —** Hospitals, universities, and schools requiring systematic hygienic standards and reporting.

3. Six Core Service Specifications

Road & Street Cleaning

Manual & mechanical sweeping, dust and debris removal along road edges, medians, and highways. Shifts coordinated day/night around traffic flow.

Sidewalk & Public Space Maintenance

Routine washing, sweeping, and upkeep of pedestrian walkways, transit plazas, markets, and terminal zones with pedestrian safety barriers.

Drainage & Sanitation Support

Clearing accessible drains, culverts, and water channels to prevent flooding; waste segregation and rapid reporting of blocked or compromised infrastructure.

Facilities & Institutional Cleaning

Supervised scheduled interior/exterior sanitation for commercial towers, medical clinics, academic compounds, and industrial parks.

Post-Construction Cleaning

Heavy debris removal, fine dust control, surface washdowns, and final handover preparation for newly constructed roads and buildings.

Landscaping & Urban Greenery

Lawn maintenance, turf laying, hedge trimming, tree planting support, daily watering, and vegetative health reporting for public spaces.

4. Fleet, Equipment & Safety Inventory

- **Specialized Sweepers & Haulers** — Mechanical road sweeping units, compactor waste trucks, and mobile light collection haulers.
- **Washing & Pressure Equipment** — Commercial pressure washers, water bowser tankers, hoses, and heavy-duty wet surface squeegees.
- **Sanitation & Drainage Tools** — Heavy culvert shovels, drainage scoops, metal rakes, drain rods, and sealed sludge containers.
- **Greenery & Grounds Equipment** — Commercial lawnmowers, motorized hedge trimmers, brush cutters, pruning shears, and bowsers.
- **PPE & Roadside Safety Rig** — EN471 Class 3 reflective vests, steel-toe safety boots, heavy gloves, respiratory masks, cones & LED warning boards.

Five-Stage Quality & Accountable Delivery Cycle

1. Assessment
Site survey & frequency schedule

2. Mobilization
Trained personnel, tools & PPE

3. Supervised Shift
Daily briefings & on-site checks

4. Quality Log
Incident & photo checklist closeout

5. Monthly Review
KPI audit & continuous improvement

5. Health, Safety & Environmental (HSE) Compliance

Roadside Traffic Safety Controls
Strict safety perimeter establishment using high-visibility reflective bollards, warning signs, and buffer vehicle placement prior to any active street shift.

Worker Safety & Equipment Mandate
Mandatory personal protective equipment (PPE) including certified steel-toe footwear, puncture-resistant gloves, reflective apparel, and respirators.

Eco-Safe Waste Segregation & Transfer
All waste handled according to city environmental standards; segregated recyclable transfer to authorized processing hubs; zero unpermitted dumping.

Hazard & Incident Tracking
Daily incident, near-miss, and hazard registries reviewed every morning. Proactive reporting of damaged or compromised public infrastructure to client.

6. Procurement Mechanisms & Contract Models

Municipal Tenders & RFQs
Formal submission capacity with verified tax, registration, and technical qualification

Pilot Area Agreements
Targeted 30-to-90 day pilot deployment on a designated corridor or facility to benchmark perfo

Service-Level Agreements (SLAs)
Recurring multi-month or annual maintenance contracts with agreed daily penalty/bo

Framework & Subcontracting
Partnering with prime infrastructure contractors, corridor developers, and real estate managem
